## DAEJIN S&T is

The Company that produces Synthetic Leather and Sustainable Fabric with Eco-friendly System.

Established in 2005, we have many years of experiences in producing

- 1. VINTAGE CANVAS which is a type of waxed canvas and treated with water-based dipping process
- 2. All kinds of SUEDE Fabric treated with water-based dipping process
- 3. Recycled polyester fabric materials (rPET) treated with water-based dipping process
- 4. Dry PU coated synthetic leather.

We own both one facility specialized in Eco friendly water-based dipping process & Another facility specialized in Dry PU coated synthetic leather.

We supply ours to our partners in domestic market(South Korea) and oversea market (Asia).

Our company was passed "VF Facility Compliance Audit" in Jun 2019.

Only the companies in compliance with VF's Global Compliance Principles can pass VF Facility Compliance Audit & ensure that safety, labor welfare and observing environmental laws.

NATURE, HUMAN, and FUTURE

## VISION & PURPOSE

We currently have many customers around the globe, and We always do our best to maintain a close partnership with our suppliers in order to provide our customers with the products with reliable high-quality products.

We are determined to secure a well-defined competitive edge in the market with reliable high-quality products. Over the years, the confidence and collaboration of our employees has permitted us to improve our capacity and competitiveness. I am confident that, with this optimal productivity and profitability, DAEJIN S&T will continue to prosper and become a country's leading manufacturer in the near future.

Eco-friendly Factory established with existing dry PU coating production line, we have kept up with the current trend with Water based Eco-friendly Factory where we additionally established in Saengrim, Kimhae.

We are actively responding to the future with future-oriented vision.  
We promise you that we will do everything in our power to satisfy our customers  
We will plan ahead and strategically invest in equipment and care about people and their businesses with humanism.  
We will expand all options and provide new value for our customers.

## HISTORY & CERTIFICATION

### **2018 ~ / Becoming a global corporation**

## PRODUCTS

VINTAGE CANVAS (WAXED CANVAS)

# VINTAGE CANVAS

The water-repellent qualities and unique character of waxed canvas have been known and used in one form or another for hundreds of years. Extremely popular in the early to mid-1900s, it has in recent years seen a major resurgence.

## Vintage Canvas is

strong and very durable, and is ideal for backpacks, work aprons, jackets, vests, dog gear, saddle bags, tote bags, book bags, storage bags, all kinds of outdoor gear and packs, for furniture, hat, cap, etc

### The main points about VINTAGE CANVAS

1. It is PE wax coated. It is more heat resistant than paraffin wax coated ones.
2. No volatile organic solvent substance is detected.
3. PE resin type has characteristics of water resistance & tasteless, harmless, odorless.
4. CO (fluorine-free) water repellent

These bases being done with our water-based PE dipping process is VINTAGE CANVAS.

### The list of base cloth

1. A base cloth for polyester : universal fabrics for "canvas"
2. A base cloth for 100%recycled poly (rPET)
3. A base cloth for cotton
4. A base cloth for Polyester + Recycled poly (rPET)

### **Animal Protection**

Everybody already knows that a ton of animals have been killed to supply natural leathers. According to Addis Ababa LLPI global Leather Industry report in 2014, The world's annual production of leather was 23bn Square Feet.

Of these, 35% of these had been used for finishing of vehicle, clothing, household furniture and ETC. Also, in terms of texture, elasticity, hydrolysis, the gap between natural and synthetic leather is on the decline gradually.

For this reason, the demand for synthetic leather is expected to rise further.

### DST MATERIAL FOR GLOVE

1. CONNECTIVE Ver.
2. CDP Ver.
3. NYLON+WET PU TYPE
4. SUPER GRIP
5. DST GLOVE FOR BASEBALL BETTING & GOLF

# DST MATERIALS for GLOVE

## ***CONNECTIVE Ver.***

***(processed with eco-friendly water based PU dipping)***

We have a wide range of embossing as offering customization including textile pattern, leather pattern (It may add performance or just change the aesthetics of a material.) It is made with water based touchscreen connectivity substances .That's why it can be applied to the gloves for industrial use including using tablet, smart phone.

Supplying to overseas manufacturing factories for several brand since 2019. It is used for a wide part of gloves to touch the touchscreen of smartphone with the gloves on.

Also, it is made from base cloth passing through '[Bluesign](#)' Standard for Textiles (it is an emerging standard for environmental health and safety in the manufacturing of textiles. The Switzerland-based organization, provides independent auditing of textile mills, examining manufacturing processes from raw materials and energy inputs to water and air emissions outputs,applying strict standards to find the harmful chemicals. So, it can guarantee all production process is conducted with safe materials and process for human body and environment.)

# DST MATERIALS for **GLOVE**

## **CDP Ver.**

*(processed with eco-friendly water based PU dipping)*

We have a wide range of embossing as offering customization including textile pattern, leather pattern. It may add performance or just change the aesthetics of a material. Material for superior colorfastness to washing & superior resilience, thanks to **cationic dyed polyester (CDP)** technology & special materials. In addition to emboss type products, our product lines include various post-processing products including DOT, MEMBRANE type for excellent grip feeling. We are Supplying to overseas manufacturing factories for several brand since 2019.

## **CDP Ver. List**

**EMBOSS Ver. DOT Ver. MEMBRANE Ver.**

## **EMBOSS Ver.**

# DST MATERIALS for GLOVE

## *DOT Ver.*

## *MEMBRANE Ver.*

# DST MATERIALS for **GLOVE**

## ***DST GLOVE with NYLON + WET PU type (nylon base + Wet PU manufacturing process)***

It features TPP free which will be included in Restricted Substances List in EU since 2020. Inner & outer layers processed with special treatments for non-slip function. And, Major uses are gloves for golf & horse-riding and it can be applied for other uses.

### ***TPP FREE***

*Triphenyl phosphate (TPP or TPHP) is a toxic flame retardant used in polyurethane foam for furniture and children's products.*

***So, TPP FREE means it is harmless to the human body.***

# DST MATERIALS for **GLOVE**

## ***SUPER GRIP***

*(For Goal keeper, American football)*

It has function of grip features to catch a ball tightly regardless of whether rain or not. Material for palm parts on gloves

The price is reasonable as compared with the ones with silicone resin. In wet conditions, it's got a function which have a better grip than other ones with silicone resin. Not existing transfer style printing & Gravure printing method.

It is able to express various color tone with "Digital print method". "Gradation": it's got a function which makes a boundary between one color tone and others so natural.

It can be applied to various bases & R/P & resins for synthetic leather. It can be applied to various fabrics such as woven, knit, mesh, ETC.

## ***Baseball Betting Gloves***

- Material for outer layer on gloves
- When betting, it helps to make hands move smoothly thanks to elastic fabric.
- Reasonable price
- This material range is capable of a wide range of embossing pattern, SPEC (inch, thickness).

## ***Gloves for GOLF***

- Material for outer layer on gloves
- In the golf swing, it helps to make hands move smoothly thanks to elastic fabric.
- Reasonable price
- This material range is capable of a wide range of embossing pattern, SPEC (inch, thickness).

RECYCLED POLYESTER MATERIALS (rPET)

# RECYCLED POLYESTER MATERIALS (rPET)

Our RECYCLED POLYESTER MATERIALS (rPET) is a wide range of material for finished products including shoe upper & glove & ETC , made from post-consumer recycled water bottles , using a water-based manufacturing process that eliminates the use of toxic solvents.

The material is certified by Global Recycled Standard, a third-party organization that specializes in sustainable production practices.

One yard of RECYCLED POLYESTER MATERIALS (rPET) represents 12 half-liter post-consumer recycled water bottles.

rPET range features the same advanced features of our original materials with polyester base cloth, such as high abrasion, durability. And Our rPET material range is capable of a wide range of thicknesses, embossing, colors and touchscreen connectivity.

5. ECO MICRO SUEDE
6. ECO SOLIDO SUEDE
7. ECO STRONG SUEDE

## ECO SUEDE

Its base cloth for polyester, CDP. It's processed with eco-friendly Water-based dipping process

### Water-based dipping process.

The process for dipping fabrics with PU resin & water. So, it can be called as eco-friendly product.

No organic solvent substance is detected.

Also, it can simplify manufacturing processes for energy conservation & minimize discharging waste water.

Daejin S&T's **ECO SUEDE**  
To be with you at your important moment.

## RECYCLE SOLIDO SUEDE

Materials in accordance with the "Eco-friendly" as a global trend. This one is blended with recycled polyester (rPET) made from post-consumer recycled water bottles. Superior colorfastness to washing.

Today, there are many recycling efforts initiated by textile brands & the number of customers who want to take part in this movement throughout the world continues to climb.

### Valuable choice for human being and natural environment :

1. plastics wastes flowing into the ocean amount to roughly 8 million per 1 year. and it causes enormous disturbances to the marine ecosystem.
2. Microplastics have polychlorinated biphenyls(PCB), polycyclic aromatic hydrocarbon(PAH),heavy metals.

So it is harmful to the human body.

Now, A small number of people's choices for Sustainable Fashion is turning into a number of choices.

## UPCYCLE SUEDE

100% Polyester rPET

Composition : 100% Recycled Polyester (rPET) + Eco friendly water based production process.

It is upcycling product, more eco-friendly & improved materials than our original recycled polyester (rPET)

Today, there are many recycling efforts initiated by textile brands & the number of customers who want to take part in this movement throughout the world continues to climb.

## UPCYCLE SOLIDO SUEDE

"CDP rPET" Blended with "High Shrinkage Polyester Yarn" :  
It has even better colorfastness to washing thanks to CDP rPET, not Polyester rPET.

Composition : CDP rPET + High Shrinkage Polyester Yarn +  
Eco friendly water based production process.  
It is upcycling product, more eco-friendly & improved materials than our original recycled polyester (rPET)

Today, there are many recycling efforts initiated by textile brands & the number of customers who want to take part in this movement throughout the world continues to climb.

---

## Microfiber Synthetic Leather

-Application available for : for furniture , shoes

## MICRO Series

### SAROS

<b>Product Name</b>	<b>SAROS</b>
<b>Backing</b>	Micro fiber
<b>Spec</b>	1.0 - 1.4mm x 54"
<b>Major Use</b>	GOLF SHOES, SHOE UPPER
<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Excellent Moldability &amp; H/F</li></ul>

### SAROS - Light

<b>Product Name</b>	<b>SAROS-Light</b>
<b>Backing</b>	Micro fiber
<b>Spec</b>	0.5mm x 54"
<b>Major Use</b>	GOLF SHOES, SHOE UPPER
<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Excellent Moldability</li></ul>

## DRY PU Series

### DJ-08J

<b>Product Name</b>	<b>DJ-08J</b>
<b>Backing</b>	Interlock
<b>Spec</b>	0.8mm x 54"
<b>Major Use</b>	SHOES LINING / INNTER LAYER
<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Excellent workability</li><li>• Good softness</li></ul>

### HX-Knittron

<b>Product Name</b>	<b>HX-Knittron</b>
<b>Backing</b>	Nylon or Polyester woven fabric
<b>Spec</b>	0.7 - 1.0mm x 40" / 0.7 - 1.0mm x 54"
<b>Major Use</b>	SHOES LINING / INNTER LAYER
<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Excellent workability</li><li>• Reasonable price</li><li>• Good softness</li></ul>

### HX-pilon

<b>Product Name</b>	<b>HX-pilon</b>
<b>Backing</b>	Nylon woven fabric
<b>Spec</b>	0.6mm x 40"
<b>Major Use</b>	SHOES LINING / INNTER LAYER
<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Excellent workability</li><li>• Reasonable price</li><li>• Good softness</li></ul>

## LEATHER Series

### CS-600N

<b>Product Name</b>	<b>CS-600N</b>
<b>Backing</b>	High density non woven
<b>Spec</b>	1.0 - 1.4mm x 54"
<b>Major Use</b>	SHOE UPPER, Applicable to all parts

<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Typical high density non woven product</li><li>• Capable of a wide range of embossing pattern</li><li>• Excellent Moldability</li></ul>
------------------------	---

### CS-600N EB

<b>Product Name</b>	<b>CS-600N EB</b>
<b>Backing</b>	High density non woven
<b>Spec</b>	1.0 - 1.4mm x 54"
<b>Major Use</b>	SHOE UPPER, Applicable to all parts

<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Typical high density non woven product</li><li>• Capable of a wide range of embossing pattern</li><li>• Excellent Moldability</li></ul>
------------------------	---

### CS-600N BU

<b>Product Name</b>	<b>CS-600N BU</b>
<b>Backing</b>	High density non woven
<b>Spec</b>	1.0 - 1.4mm x 54"
<b>Major Use</b>	SHOE UPPER, Applicable to all parts

<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Typical NUBUCK product</li><li>• Excellent Moldability</li></ul>
------------------------	--

### N.BIC

<b>Product Name</b>	<b>N. BIC</b>
<b>Backing</b>	Normal non woven
<b>Spec</b>	1.2 - 1.4mm x 54"
<b>Major Use</b>	SHOE UPPER, Applicable to all parts

<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Having same physical property test result with existing product as lower price</li><li>• Capable of a wide range of embossing pattern.</li></ul>
------------------------	--

## Special Series

### Cyclone

<b>Product Name</b>	<b>Cyclone</b>
<b>Backing</b>	High density non woven
<b>Spec</b>	1.0 ~ 1.4mm x 54"
<b>Major Use</b>	SHOES LINING / Applicable to all parts
<b>Characteristics</b>	<ul style="list-style-type: none"><li>• High abrasion (5,000cycles+)</li><li>• Excellent Moldability</li></ul>

### SEEK

<b>Product Name</b>	<b>SEEK</b>
<b>Backing</b>	High density non woven
<b>Spec</b>	1.0 ~ 1.4mm x 54"
<b>Major Use</b>	SHOES LINING / Applicable to all parts
<b>Characteristics</b>	<ul style="list-style-type: none"><li>• "Natural Crack" Effect</li></ul>

### JOKER

<b>Product Name</b>	<b>JOKER</b>
<b>Backing</b>	High density non woven
<b>Spec</b>	1.0 ~ 1.4mm x 54"
<b>Major Use</b>	Use for Tongue & Accessory
<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Pearl Effect with Sparkle</li></ul>

### MAGIC

<b>Product Name</b>	<b>MAGIC</b>
<b>Backing</b>	High density non woven
<b>Spec</b>	1.0 ~ 1.4mm x 54"
<b>Major Use</b>	Use for Tongue & Accessory
<b>Characteristics</b>	<ul style="list-style-type: none"><li>• Aluminum Foil Effect</li></ul>

# Thank You

This catalogue is to present you DAEJIN S&T Products that were made with Eco-friendly process .  
Especially, DAEJIN S&T is making products based on value related to NATURE, HUMAN, and FUTURE.
